Healthy Building Network

INVITATION

Institutional investors, developers and lenders increasingly focus on the environmental, social and governance (ESG) aspects of their real estate portfolios. **HealthBuild 2022** is the first conference to focus on the social aspects of ESG in real estate – the impact of buildings on their occupants, the surrounding community, and the supply chain supporting the building.

While we shape our buildings, our buildings in turn shape us: the indoor environment in which we work, learn, play and live affect our health, productivity, and wellbeing. HealthBuild 2022 will bring together Europe's experts on this issue, providing a fertile mix of academic knowledge and industry experience.

SPEAKERS

HealthBuild 2022 discusses the latest technological developments in building sensors and measurement, practical cases of healthy buildings, research on building tenants' wellbeing, and the financing of healthy buildings. Speakers included are prominent academics from MIT, University College London, Maastricht University, and RWTH Aachen, as well as relevant industry speakers such as architects, real estate financiers, building developers, and tenants.

John Macomber

HealthBuild 2022 includes a keynote by the author of the book on Healthy Buildings, "Healthy Buildings: How Indoor Spaces Drive Performance and Productivity", Harvard Business School's John Macomber.

Jill Brosig

As Managing Director and Chief Impact Officer of Harrison Street, the largest senior and student housing investor, Jill Brosig oversees the measurement, management, reporting and enhancement of the company's environmental, social and governance (ESG) initiatives. Her key areas of focus include human health and wellness.

Carina Nørregaard

As Partner Architect at LIAG architects, Carina Nørregaard, states that our physical environment has a major influence on us as humans.

Nicolás Durán

Part of the Bartlett Real Estate Institute at University College London, Dr. Nicolás Durán is an expert in urban, real estate, and housing economics topics. His research focusses on the impact of the built environment on health and productivity.

Healthy Building Network

REGISTRATION

HealthBuild 2022 is initiated by the **Healthy Building Network**, and organized by its project partner Maastricht University.

Please visit **Healthy Building Network** for more information and the possibility to register to the HealthBuild Conference 2022. You're cordially invited to join us on **13 October!**

CONFERENCE PROGRAM

8:30 Walk-in with Coffee

09:00 Welcome and Kick-off

Nils Kok

10:00 Presentations: Healthy Building Development

Speakers including Carina Nørregaard (Partner Architect at LIAGG)
